

Alvaro Reis

AI Engineer · Agentic Systems · Full-Stack Engineering

Miramar, FL | (954) 850-0532 | alpau.reis@gmail.com | linkedin.com/in/alpaureis | github.com/paureis

SUMMARY

AI engineer building production agentic systems and full-stack cloud applications. Sole engineer on a commercial multi-tenant SaaS, contracted by two healthcare organizations ahead of public launch, using Azure Functions, Storage Queues, Redis, and the Anthropic Claude API to automate multi-source candidate discovery and structured evaluation. Ships through a structured agentic workflow built on 20+ self-authored Claude Code skills. Full-stack in Next.js, TypeScript, and Python; AWS Solutions Architect Associate and Azure AI Engineer Associate certified.

AI & AGENT ENGINEERING PRACTICE

- **Agentic development workflow:** ships production software through a component-based lifecycle (planning, implementation, verification, closeout) driven by a self-built library of 20+ custom Claude Code skills.
- **Multi-agent orchestration:** designs pipelines where planning agents hand off to implementation agents, with finished work critiqued by independent reviewer agents that start with no prior context, removing author bias before merge. Runs cross-model review across Claude Code, OpenAI Codex, and Cursor.
- **Verification and context harnesses:** builds the scaffolding that keeps agent work reliable: build verification between phases, staging checklists, and project logs updated at every phase so a fresh agent session resumes with full context.
- **Tooling fluency:** daily Claude Code use across terminal, desktop, and remote mobile sessions; Claude Agent SDK; custom skills and subagents; MCP; OpenAI Codex; Cursor.

TECHNICAL SKILLS

- **AI & Agents:** Anthropic Claude API, OpenAI API, Claude Code, Claude Agent SDK, OpenAI Codex, Cursor, Model Context Protocol (MCP), agent orchestration, multi-agent systems, prompt engineering, context engineering, retrieval-augmented generation (RAG), Azure AI Services, Microsoft Foundry
- **Languages:** Python, TypeScript, C#, JavaScript, SQL / T-SQL, Java, C
- **Web & APIs:** Next.js, ASP.NET 8, REST APIs, JSON contracts, Playwright, Cheerio, Proxycurl
- **Cloud & DevOps:** Microsoft Azure (App Service, Functions, Storage Queues, Azure SQL, Key Vault, Container Apps), AWS, Docker, GitHub Actions, CI/CD, Managed Identity, Redis, Application Insights, Log Analytics, structured logging
- **Data:** SQL Server, SSIS, Power BI, Kimball dimensional modeling
- **Auth & Security:** Microsoft Entra ID SSO, NextAuth.js, RBAC

EXPERIENCE

Full-Stack & AI Engineer | Forward Thinkers Consulting (Contract)

Feb 2026 - Present

AI Talent Scout Platform | Multi-Tenant SaaS | Next.js, TypeScript, Azure, Claude API, MCP, Redis, GitHub Actions

- Sole engineer on a commercial multi-tenant SaaS platform that automates multi-source candidate discovery and structured evaluation against employer-defined criteria; delivered the Azure infrastructure, database schema, agent pipeline, frontend, authentication, and CI/CD end to end for two healthcare clients.
- Architected an AI agent pipeline using Azure Functions and Storage Queues to coordinate candidate discovery through Proxycurl, Cheerio, and Playwright and structured evaluation through the Anthropic Claude API, with Redis-based rate limiting across concurrent function instances.
- Provisioned the complete Azure environment, including production and staging App Services, serverless Azure SQL, Key Vault with Managed Identity, Redis, Container Apps, Application Insights, and Log Analytics in East US 2 to support US data residency.
- Designed a 24-table relational schema with foreign-key constraints, filtered unique indexes, CHECK constraints, and DDL-enforced immutable audit logging; created idempotent deployment scripts for production and staging.
- Built GitHub Actions CI/CD pipelines that deploy development changes to staging and main-branch changes to production, completing Next.js standalone deployments in under two minutes; integrated Microsoft Entra ID SSO through NextAuth.js and enforced tenant isolation with RBAC at the middleware and API layers.
- Migrates Pyramid Analytics views and OLAP cubes from a Kimball-modeled enterprise data warehouse to Power BI, supporting self-service analytics for 25 stakeholders..

Software Engineering Intern | NEO Consulting Group

Jun 2025 - Aug 2025

- Built a production address-comparison microservice using ASP.NET 8 Minimal APIs, Google Address Validation, Geocoding, and OpenAI, combining deterministic scoring with an LLM fallback for low-confidence matches and delivering the solution in under 10 weeks.
- • Reduced redundant external API calls by approximately 40% with Redis caching, lowering average latency from approximately 800 ms to 450 ms; added request validation, structured logging, consistent JSON error contracts, and zero-downtime deployments to Azure App Service through GitHub Actions.

IT Intern | Community Care Plan

Jul 2021 - Aug 2021

- Resolved 50+ Tier 1 support tickets for a 200+ employee healthcare organization; documented Microsoft 365 troubleshooting procedures for a shared knowledge base.

SELECTED PROJECTS

- **Healthcare Data Warehouse & Analytics | SQL Server, SSIS, Power BI.** Built a Kimball star schema integrating four data sources into 15+ dimension and fact tables, automated ETL workflows, and developed three Power BI dashboards.
- • **Enterprise VLAN Network | TP-Link Omada.** Designed three isolated VLANs using a firewall gateway and managed switch and validated complete inter-VLAN isolation..

CERTIFICATIONS

- Microsoft Certified: Azure AI Engineer Associate (AI-102), (March 2026)
- AWS Certified Solutions Architect - Associate, (February 2026)
- CompTIA A+, (September 2025) · AWS Certified Cloud Practitioner, (February 2025)
- Microsoft Certified: Azure Data Fundamentals (DP-900) · Azure AI Fundamentals (AI-900) · Azure Fundamentals (AZ-900), 2024
- Claude Certified Associate – Foundations (July 2026) · Claude Certified Developer – Foundations (August 2026)
- Claude Certified Architect (August 2026) Claude Certified Architect Professional (August 2026)

EDUCATION

M.S. Computer Science | Georgia Institute of Technology (Online)

Expected 2029

Admitted; coursework begins Spring 2027

B.S. Information Technology | University of Central Florida

2025

GPA 3.5 | Relevant coursework: Databases, OOP, Security in Computing, Machine Learning

ACTIVITIES & LANGUAGES

Hack@UCF Cyber Defense Club · AI @ UCF | English (Fluent) · Spanish (Fluent)
